

## **Aquaponics Workshop at the Aromas Water District Office**

Saturday, July 12th

10:00 am - Noon

at the Aromas Water District 388 Blohm Ave., Aromas

Instructor: Brad Webb

Hosted by Transition Aromas

**Aquaponics is a food production system in which both vegetables and fish can be raised in separate tanks by circulating the same water back and forth between them.** At this workshop, you will learn basic aquaponics techniques, the benefits and drawbacks of aquaponics, and which plants you can grow in different situations. You will also help build two mini aquaponics systems. These mini systems are designed to fit on a porch, but the principles you learn will apply to any size system you wish to build. Space and imagination will be your only limits.

The workshop will last two hours – a little longer if needed - and the class will have two up-and-running mini aquaponics systems at the end. One will be raffled off to a lucky participant to take home!

There is a \$10 materials fee to attend, and all materials will be provided. Brad will give a cost breakdown, should you want to make an aquaponics system of your own.

Brad has attached a short video he made specifically to prepare people for this workshop. Please watch it ahead of time. He will answer questions about it at the beginning of the workshop. <http://www.youtube.com/watch?v=uFm0WGxhD-g&sns=em>

**Please RSVP early, as space is limited. Email Brad at [goose3984@yahoo.com](mailto:goose3984@yahoo.com) or call him before 9 PM at (831) 537-7546.**
